

# EQUIPMENT

Want to know equipment location, usage, condition, and cost without heading out to the construction site to take a look?

## Know Your Equipment

- Record and track usage, cost, location, condition, and more for your owned, rented, or leased equipment
- Track equipment usage for idle, down, and in-use time, and access a history of this information by equipment, job, cost code and/or date range
- Track full operating expenses such as fuel, insurance, labor hours, service/repair costs and depreciation
- Enter equipment hours with payroll timecards through the Payroll module or as separate entries within the equipment usage journal when costing out by hour, day, week, or month
- Automatically send usage hours to Job Costing at the cost code level
- Optionally send equipment costs to the General Ledger in order that it may balance with Job Costing
- Equipment integrates seamlessly with both the Job Costing and Payroll modules and optionally with General Ledger and Accounts Payable
- Equipment produces service/repair work orders to facilitate the automation of scheduled maintenance repairs
- Fixed Assets module for depreciation of assets and equipment (both tax and book methods available)
- Use several reports to see usage, costs, and profit for each piece of equipment
  - **Equipment List**
  - **Equipment Usage**
  - **Detail History Report by Job or Piece of Equipment**
  - **Usage vs. Cost**
  - **Equipment Profit Report**
  - **Work Order Summary or Detail**

*Know what you have, where it is, and what it costs!*
